Education

Eastern Florida State College

General Studies

Associate in Arts 2013

Eastern Florida State College

Media Production

Associate in Science 2012

Summary

Full-Stack Engineer with 10+ years building scalable, production-ready web apps. Expert in React and TypeScript on the front end and Node.js with relational databases on the back end. Strong experience designing APIs, modeling data in Postgres/MySQL, and shipping reliably with Docker and CI/CD on AWS/GCP. Comfortable collaborating across product/design/engineering to deliver features end-to-end. Familiar with GraphQL, Redis, and React Native.

Experience

Big Pixel LLC

Mar 2021 - Jul 2025

Senior Full Stack Developer

Remote

- Built full-stack web applications using React, TypeScript, Node.js/Laravel, and PostgreSQL.
- Architected backend APIs and data models; improved performance and reliability at scale.
- Designed workflows and implemented CI/CD with Docker/GitHub Actions for predictable releases.
- Collaborated with product/design to deliver user-focused features on time with high quality.
- Cloud deployments and monitoring across AWS/GCP for resilience and cost awareness.

Independent Developer - Contract Projects

Mar 2020 - Mar 2021

Independent Developer

Melbourne, FL

- Delivered small web apps and internal tools for local clients, from requirements through deployment.
- Implemented data-driven pages with **PHP/JavaScript/MySQL** and progressively enhanced them for better UX on low-power devices.
- Set up lightweight hosting, backups, and monitoring to keep sites stable post-handoff.

Florida Today

Aug 2015 - Mar 2020

Web Developer

Melbourne, FL

- Built and maintained responsive sites with PHP, MySQL, JavaScript, HTML/CSS.
- Migrated legacy systems to modern stacks, improving stability and performance.
- Partnered with editorial/marketing to translate requirements into scalable solutions.
